

Software Installation Guide – GenC Freshers

👋 Welcome to Cognizant! This guide will help you understand how software is installed after you raise a request. Please follow the steps carefully to ensure smooth installation.

Installation Process Overview:

Once you raise a software request in ServiceNow, it goes through the following steps:

1. Approval – Your Project Manager (PM) approves the request.
2. Installation Type – Based on the software, installation happens in one of three ways:

⚙️ Auto Installation – Basic apps installed automatically via Intune.

💻 Self Installation – Custom apps you install via 1C MyToDos.

👤 Manual Installation – Advanced apps installed by an engineer via MS Teams.

⚙️ Auto Installation:

Steps to Follow:

1. Restart your laptop.
2. Sync your laptop: Settings → Accounts → Access work/school → Info → Sync
3. Wait 30 minutes to 1 hour.
4. Check installation status: Task Bar → Search “Company Portal” → Downloads & Updates
5. You will receive an email within 24 hours with the installation status.

Note: If not installed within 3 days, the request moves to Manual Cart. An agent will contact you via MS Teams.

? FAQs – Auto Installation

Q1. When does installation start after PM approval?

Immediately, if your system is online and connected to the network.

Q2. Will I get a notification when installation starts?

No, but you’ll get a desktop notification once it's completed or failed.

Q3. How do I check if the software is installed?

Start Menu, Task Bar Search, Settings → Apps → Installed Apps, Company Portal → Downloads & Updates

Q4. Can I see if failed software moved to manual cart?

No, this happens in the backend.

Q5. When will an agent contact me?

Within 3 business days.

Q6. What if features/plugins are missing?

Raise a GSD ticket under: Install Non-standard software or plugin (Desktops/Laptops)

Self Installation:

Steps to Follow:

1. Go to 1C MyToDoS.
2. Click Proceed Now → Download.
3. Installation files will be saved in your Downloads folder.
4. Complete the installation manually.
5. After installation, click:

✅ Successfully Installed (If software is successfully downloaded, installed and working as expected) - Request will be closed.

❌ Installation Failed (If you face issue while downloading, installing or working the software) – Request moves to Manual Cart.

FAQs – Self Installation:

Q1. Will I get the download link via email?

No. It will be available only on 1C MyToDoS.

Q2. What if I face issues while downloading or installing?

Click the appropriate button: ✅ Successfully Installed or ❌ Installation Failed.

Q3. What if I clicked “Successfully Installed” by mistake?

Raise a Reinstall Request via MyService – Software Maintenance.

Q4. When will an agent contact me after clicking “Installation Failed”?

Within 3 business days via MS Teams.

Q5. What if features/plugins/extensions are missing?

Raise a GSD ticket under: Install Non-standard software or plugin (Desktops/Laptops)

Manual Installation:

Process:

Advanced apps requiring admin access are installed by an engineer.

After PM approval, the request moves directly to Manual Cart.

An agent from the Software Asset Management (SAM) team will contact you via MS Teams.

? FAQs – Manual Installation:

Q1. When will an agent contact me after PM approval?

Within 3 business days. Please stay available on MS Teams.

Q2. What if I miss the agent's message?

If there's no response, the request will

Some of the Common Errors and Troubleshoot Steps:
